EDUCATION

IT STEP Academy

Bachelor of Software Development

Astana, Qazaqstan

May 2022 - December 2024

EXPERIENCE

Web Csharp Developer

Halyk Life Ensurance Company

June 2024 – August 2024

Almaty, Qazaqstan

- Developed a REST API's with microservice architecture using ASP.NET
- Completed courses on Linux, Docker, Csharp, SQL, included in the internship program, with a 100 percent result in all disciplines

FullStack Developer

Kiteo startup

July 2024 – Present

Astana, Qazaqstan

- Developing a REST API on Spring for calculating unit economics for businesses
- Buildded website based on Next.JS with shadcn components with using clean architecture approach
- Worked with a team of developers using CRM System called Linear

PROJECTS

Selmag | *Java, PostgreSQL, Docker*

May 2024 – Present

- Developed a REST API with microservices architecture
- Implemented OAuth 2.0
- Implemented Victoria Metrics to collect service metrics.
- Implemented Eureka
- Implemented Keycloak, OAuth 2.0/OIDC-server for authorization of services and user authentication.
- Impelemented Grafana Loki as a centralized log storage.
- Implemented Grafana Tempo as a centralized repository for traces.
- Implemented Grafana for visualization for metrics, logs, traces
- Impelemented Docker and Kubernetes

Kiteo | *Next.js, Java*

June 2024 – Present

- We are developing a platform to automate financial tracking for SMBs. It monitors expenses, income, and marketing effectiveness, generating comprehensive reports to help businesses optimize their operations and profitability. Our team of 7 uses Next.js/React for the frontend and Java/Kotlin for backend microservices. The platform will offer a freemium model and integrate with services like Tableau, BigQuery, and Kaspi. Active development starts in July, targeting an MVP release by month-end.
- Developed a fullstack application for startup named Kiteo
- Worked in a team with agile system, and using CRM platforms
- Used a Next.js for frontend
- Used a Java Spring for backend

ASP Ecommerce | *Csharp ASP.NET, PostgreSQL*

July 2024 – July 2024

- That was one of my educational tasks from Halyk Life trainee programme. The project is online store with microservices architecture
- Used a clean code approach
- Added a docker for project
- Implemented Halyk Bank's Epay API for payments
- Used a PostgreSQL as a storage
- Used ocelot for api gateway

TECHNICAL SKILLS

Languages: Java, , C++/CSharp, SQL (Postgres, MySQL, MongoDB), JavaScript, HTML/CSS

Frameworks: React, Node.js, FastAPI, Spring, React Native, Next.js

Developer Tools: Git, Github/Gitlab, Docker, Google Cloud, Docker, Postman, Kubernetes, Notion, Obsidian, Linear

SOFT SKILLS

Communication: Effectively conveying ideas and information to team members and stakeholders.

Team Collaboration: Working efficiently within a team, contributing to group efforts, and fostering a positive team environment.

Problem-Solving: Analyzing issues, thinking critically, and finding innovative solutions.

Adaptability: Adjusting to new challenges and changes quickly and efficiently.

Time Management: Prioritizing tasks and managing time effectively to meet deadlines.

Leadership: Guiding and motivating team members to achieve project goals.

Creativity: Bringing new ideas and perspectives to projects and tasks.

Attention to Detail: Ensuring accuracy and thoroughness in all aspects of work.

Emotional Intelligence: Understanding and managing your own emotions, and recognizing and influencing the emotions of others.

Conflict Resolution: Navigating and resolving disagreements in a constructive manner.
